

## BMP 014 - Recycle

**Description of Potential Pollutant and Source:** Many materials, both hazardous and non-hazardous, can be sources of pollutants. Recycling will be employed to reduce the amount of waste material exposed to storm water on the Activity.

**Description of BMP:** Recycling will be used to the fullest extent possible in all situations.

**Application Guidance:** Recycling collections will be conducted at least weekly for recyclable items such as solvents, oil, scrap metals, wash water and absorbent materials. Separating the recyclable items facilitates recycling.

The frequency for implementing of this BMP has been provided as general guidance. However, a facility operator may wish to establish a more suitable frequency. This will require SWPPP implementers to make judgments based on facility operations and conditions.

**Training:** Personnel will be trained on proper recycling techniques along with posting and maintenance of signs.

**Effectiveness and Cost:** Effectiveness and cost will be site specific.

**Limitations:** Local vendors may not be available to receive certain recyclable materials.
